

Zeddoun Lokmane

+213-797855624 @ lokmanezeddoun@gmail.com github.com/lokmanezeddoun
linkedin.com/in/lokmanezeddoun Higher School Of Computer Science Tlemcen, Algeria

Currently in fifth year at the Higher School of Computer Science in Sidi Bel Abbès, specializing in Artificial Intelligence and Data Science. Passionate about computer vision and AI engineering, with hands-on experience in PyTorch, TensorFlow, Keras, scikit-learn and OpenCV. Proficient in building training pipelines, experiment tracking with Weights & Biases and cloud training (GCP). Significant experience in web development and back-end engineering with Node.js, GraphQL (Apollo Federation), RabbitMQ, Redis and containerized deployments (Docker, Kubernetes, CI/CD).

Skills

AI & Machine Learning	PyTorch, TensorFlow, Keras, scikit-learn, NumPy, Pandas
Computer Vision	OpenCV, YOLOv11 (object detection), image/video processing, data labeling & augmentation
MLOps & Training	Weights & Biases (W&B), Google Cloud Platform (GCP), Docker, Kubernetes, CI/CD
Web Development	Node.js, NestJS, Express, React, Next.js, GraphQL, Apollo Federation, Socket.IO
Databases & Messaging	MySQL, PostgreSQL, MongoDB, Redis, RabbitMQ
Languages	Arabic (Native), French (Fluent), English (Fluent), Spanish (Intermediate)

Education

2021	Tlemcen, High School Mahi Boudmedienne
2018	• 17/20 in High School Diploma
2026	ESI SBA, Higher School Of Computer Science
2021	Master in AI & Data Science

Professional Experience

October 2025 December 2024	Eagle Orbit (Remote) — Backend Engineer - Collaborated with specialized teams to develop scalable software solutions for enterprise clients using Bun.js runtime and Apollo GraphQL federation. - Architected and implemented microservices with Apollo Federation for efficient service communication and data management. - Built high-performance messaging systems using RabbitMQ and Redis for pub/sub, search, and scripting modules. - Managed containerized deployments using Docker, Kubernetes and Jenkins CI/CD for automated testing and deployments.
January 2025 September 2024	Evoload — Full Stack Developer (TSM System & IoT) - Designed and developed a Transport and Shipping Management (TSM) system using Node.js and React. - Implemented a TCP server acting as packet decoder for GPS trackers, enabling real-time IoT data reception and interpretation. - Developed real-time features with Socket.IO for live vehicle tracking and notifications. - Integrated AWS S3 for object storage and set up CI/CD pipelines with GitHub Actions.

October 2024	Algérie Télécom — Full Stack Developer (Nest.js, React, TypeScript)
September 2024	› Developed a web application for order and service management using Nest.js, React, and TypeScript. › Implemented user management, automated order printing, service and financial modules. › Integrated authentication and role-based authorization across organizational levels. › Streamlined workflows and improved administrator interfaces.

Personal Projects

- › ALPR — Automatic License Plate Recognition System (Final-year team project & internship) [\[Link !\[\]\(95b42f0077faf7439a26242a54e021ec_img.jpg\)\[Link !\[\]\(e097ab4c08b8186dd0908330bbc2dc28_img.jpg\)\[Link !\[\]\(1e9d865c5de095f8e3304757c49e79d7_img.jpg\)\[Link !\[\]\(735b10d724a5f0ec5005c4eb3eb9c9d1_img.jpg\)\[Link !\[\]\(e6250f05bc27fa93236b816562b699f9_img.jpg\)

Certifications

---](#)

- › EF SET English Certificate C1 (2025) – Score 62/100, advanced level. [\[Link\]](#)
- › EDUCOSYS Hands-on Generative AI (2025) – Practical training on generative AI and language models. [\[Link\]](#)
- › Full Stack Open (University of Helsinki, 2024) – Completed all parts covering MERN stack, testing, CI/CD and containerization. [\[Link\]](#)
- › Graph Developer Professional - Apollo (2024) – Expertise in Apollo Federation for building federated supergraphs. [\[Link\]](#)

Interests & Hobbies

- › Programming, reading, gaming, traveling, open-source contributions
